Pod Color		Tan	Buff	Tan	Tan	Buff	Tan	Brown	Tan	Tan	Tan	Brown

2020

Conventional Soybeans

www.GalenaGenetics.com

- 1.1 maturity
- Fast emergence with very good IDC score
- Very high yield potential
- Superior standability and excellent SDS tolerance
- PI88788 type of SCN protection
- Medium plant height

- 1.2 maturity
- Excellent emergence and standability
- Excellent SDS tolerance and superior PRR protection
- PI88788 type SCN protection
- Suited for wide row and drilled conditions
- Medium plant height

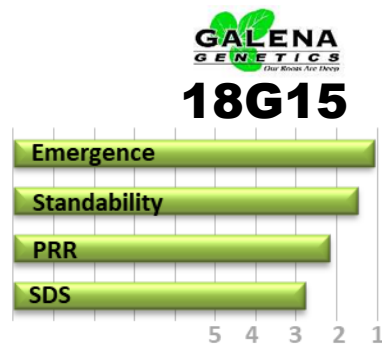

- 1.6 maturity
- Excellent emergence and very good standability
- Very high yield potential
- Compact plant type that does well in both drilled and wide row conditions
- PI88788 type SCN protection
- Medium plant height

- 2.0 maturity
- Excellent emergence and standability
- Tough and durable, a very high yielding variety
- Peking type SCN protection
- Strong disease protection package
- Medium plant height

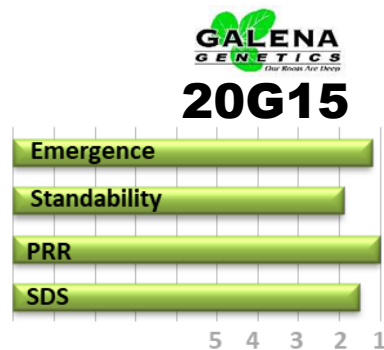

- 2.2 maturity
- Excellent emergence
- PI88788 type of SCN protection
- Excellent SDS tolerance and SCN resistance give this bushy variety very high yield potential
- Medium plant height

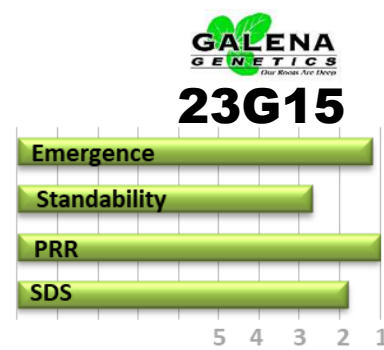

- 1.8 maturity
- Superior emergence and excellent standability
- Excellent yield potential
- Nice bushy plant type
- PI88788 type of SCN protection
- Medium plant height

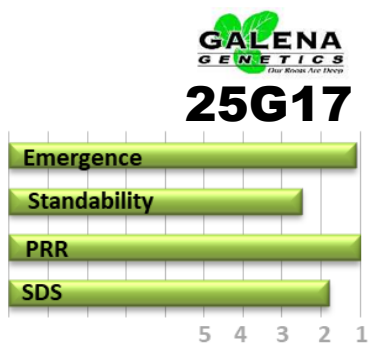

- 1.9 maturity
- Excellent emergence and standability
- Excellent SDS and very good IDC tolerances
- PI88788 type SCN protection
- Bushy plant type
- Suited for drilled and wide row environments
- Medium plant height

- 2.0 maturity
- Attractive, full plant type and high yielding line
- Excellent emergence
- Excellent SDS tolerance
- PI88788 type of SCN protection
- Superior PRR protection
- Medium plant height

- 2.3 maturity
- Excellent emergence
- Big-full plant type with superior disease resistance package and consistently excellent yield potential
- Excellent PRR protection
- PI88788 type of SCN protection
- Medium tall plant height

- 2.5 maturity
- Excellent emergence
- Consistent performance
- PI88788 type of SCN protection
- Rps1K gene for PRR protection
- BSR and SDS tolerant
- Excellent PRR protection
- Medium tall plant height

- 2.6 maturity
- Outstanding yield potential
- Excellent emergence with excellent SDS tolerance
- PI88788 type of SCN protection
- Healthy, full plant type
- Medium plant height

5.0 : Not Recommended 4.0 : Average 3.0 : Good 2.0 : Very Good 1.0 : Excellent
